Corporate Profile

31 March 2026

Introduction to Kim Loong Resources Berhad (“KLR”) Group

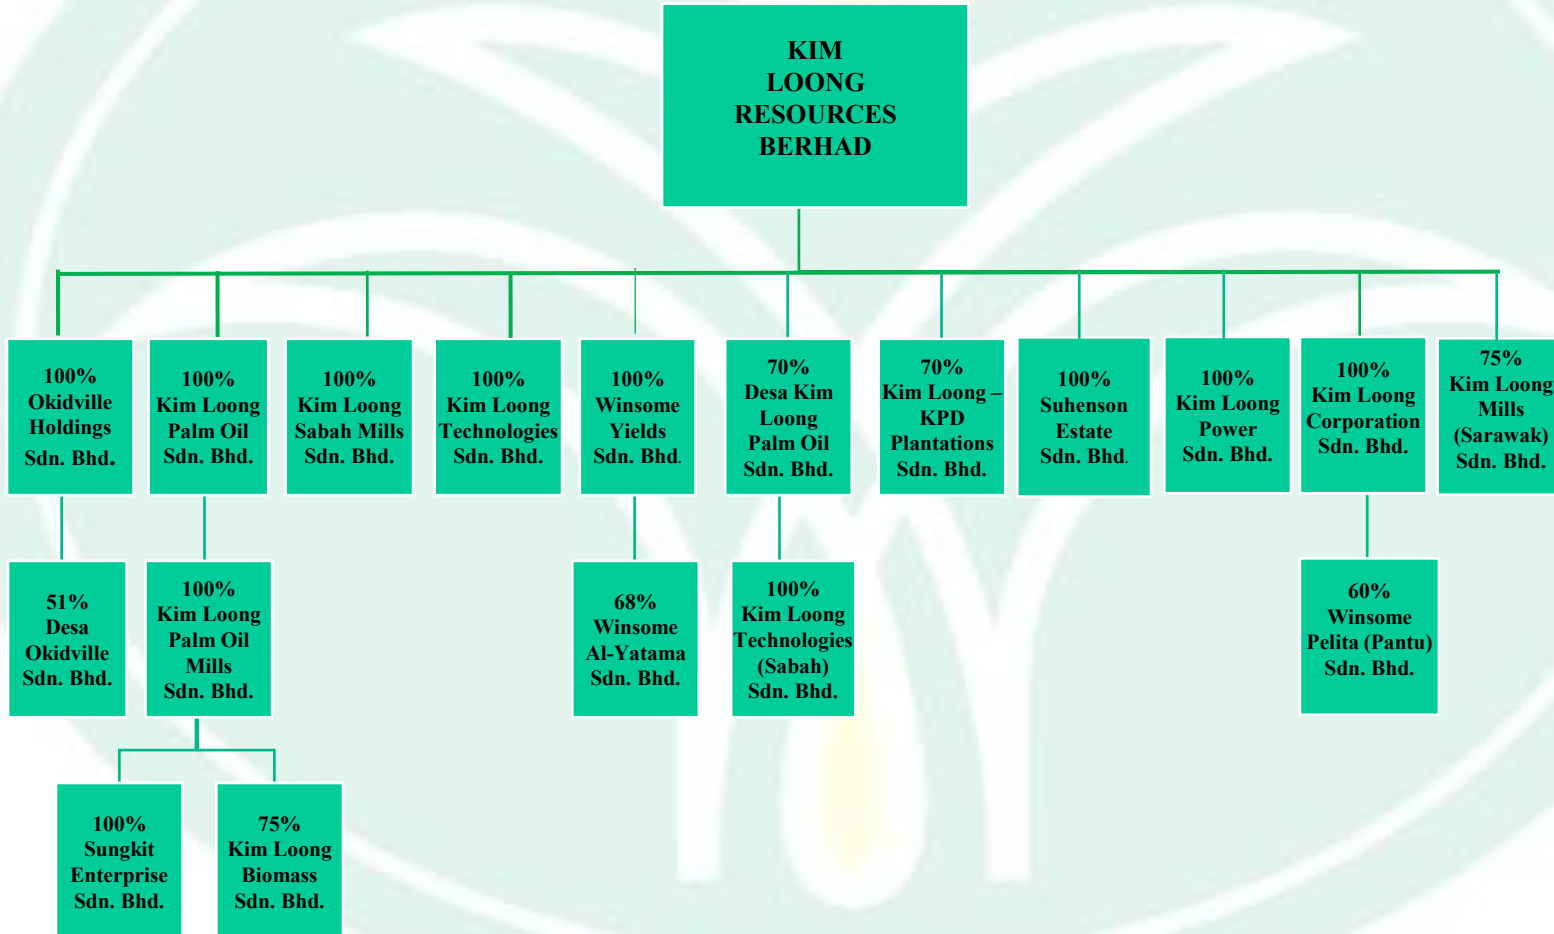

- KLR’s holding company, Sharikat Kim Loong Sendirian Berhad, had its beginning back in 1967 with a 1,000 acres rubber plantation in Ulu Tiram, Johor
- KLR is listed on the Main Market of Bursa Malaysia Securities Berhad since year 2000 and currently with a RM2.48 billion market capitalisation
- KLR is primarily involved in oil palm cultivation and related businesses which include the following:
 - About 17,000 Ha of oil palm plantations in Sabah, Sarawak and Johor
 - 3 palm oil mills located in Johor and Sabah with a total processing capacity of 295MT of FFB per hour

CPO OER COMPARISON

Note :

*The statistics for Malaysia National CPO extraction rates are extracted from MPOB web-site based on calendar year 2021 - 2025 whilst the figures from KLR Group are based on its financial year (Feb – Jan).

ACHIEVEMENTS

2025

- Kota Tinggi Mill won the Prime Minister's Hibiscus award 2024/2025 for Notable Achievement in Environment Performance.

2024

- KLRB won The Edge Billion Ringgit Club ("BRC") 2024 award for the highest growth in profit after tax over three years in Malaysia under the plantation sector.

2023

- Following year 2022, KLRB has again been recognised by Forbes Asia together with the other Eight Malaysian companies as part of its coverage of Best Under A Billion 2023, which highlights 200 Asia-Pacific companies with less than US\$1 billion in revenue and consistent top-line and bottom-line growth.
- All the 3 palm oil mills and 2 palm fiber oil solvent extraction plants under the Group passed the International Sustainability and Carbon Certification ("ISCC") audit and obtained ISCC certification (refer following page).
- In December 2023, biogas plant at Telupid Mill commenced supplying power up to 1.5 MW to grid.

2022

- KLRB is one of the Seven Malaysian Companies selected by Forbes as Asia's Best under A Billion 2022 list.
- In December 2022, biogas plant at Keningau Mill commenced supplying power up to 2.0 MW to grid.

Environmental, Sustainability and Governance (ESG)

Environmental

- Zero burning in land clearing
- Soil enrichment and conservation program
- Riparian reserves
- Reduction of greenhouse gas emission
- Waste and effluent management

Sustainability

- Human and workers rights
- Health and safety
- Freedom of association and collective bargaining
- Improving the quality of life
- Diversity and inclusion
- Contribution to society

Governance

- Anti-bribery and anti-corruption policy
- Transparency
- Shareholder rights

Green Practices

Mill

- We have implemented three methane capture facilities for the renewable power generation projects at our three mills which reduce greenhouse gas emissions as well as reduce the reliance on diesel power generators during start-up or low crop period.
* For latest progress, please refer to Near Term Prospect under Mill (power projects).
- Our effluent treatment systems allow capturing of greenhouse gas to minimise greenhouse gas emission to the atmosphere and are adequately designed to meet the mandated discharge parameters.
- Based on readings of our three mills for 12 months up to January 2026, the amount of GHG (Methane) captured, which were either destroyed or repurposed to generate renewable energy for sales as well as to reduce our dependence on diesel power generators, was 26.7 million m³ (FY2025: 30.5 million m³).

Plantation

- The Group adheres strictly to the policy of zero burning in both new plantings and replanting of oil palm. Zero burning keeps the air smoke-free. The debris remnants, comprising bushes or small trees which have been felled, are shredded and spread in the field to biodegrade. This releases nutrients and adds valuable organic matter to the soil, reducing the usage of chemical fertilisers during the immature period.
- Planting of leguminous cover crop in new planting and replanted areas. The fast-growing plants provide cover to protect the soil and build up nutrients in the topsoil as well as to suppress weeds.
- Solid organic waste material generated from the milling operations such as decanter cake and empty fruit bunches (“EFB”) are applied in fields, especially at marginal soil areas. Scheduled wastes are disposed of properly.

Dividend Policy

KIM LOONG
RESOURCES BERHAD

Target Dividend Payout Ratio

- » We do not have a formal dividend policy but we are committed to pay-out at least 30% of profit.
- » Our pay-out rate in the past 5 years are as follows:

BUSINESS OUTLOOK AND STRATEGIES

Near Term Prospect

KIM LOONG
RESOURCES BERHAD

Plantation

- » The Group expects a 5% growth in FFB production for FY2027, after taking into account the improved age profile of young productive palms and on-going replanting program.
- » In terms of CPO price prospects, the Management expects the average CPO price for FY2027 to stay in the range of RM4,000 – RM4,500 per MT.
- » The Management targets to replant about 700 hectares in FY2027.

Near Term Prospect (continued)

KIM LOONG
RESOURCES BERHAD

Mill

- » Despite stiff competition from surrounding mills, we target to achieve a total mill processing throughput of 1.6 million MT of FFB for FY2027.
- » Estimated sales revenue for excess palm kernel shells to third parties is about RM20 million from our three mills in FY2027.
- » Palm fiber oil solvent extraction plants (“PFOE”) in our Kota Tinggi and Keningau mills are running satisfactorily, contributing revenue and profit for the Group.

Near Term Prospect (continued)

KIM LOONG
RESOURCES BERHAD

Mill

Power projects implementation in:

- » Mill at Kota Tinggi, Johor
 - 3 units of 500 kilowatts gas engine for internal use.
 - Successfully obtained approval for net export capacity of 1.8 megawatt from Sustainable Energy Development Authority (“SEDA”) Malaysia in April 2015 and Renewable Energy Power Purchase Agreement (“REPPA”) has been signed with Tenaga Nasional Berhad (“TNB”).
 - Installation of 2 units of 1.2 megawatts gas engine for supplying electricity to TNB grid was completed and commenced operation in June 2019. Replacement of 1 unit of 1.2 megawatts gas engine took place in September 2024.
 - For FY2026, revenue of RM5.6 million has been generated from supplying power to TNB grid. On average, annual revenue is about RM5 to 6 million.

Near Term Prospect (continued)

KIM LOONG
RESOURCES BERHAD

Mill (continued)

Power projects implementation in: (continued)

- » Mill at Keningau, Sabah
 - 2 units of 500 kilowatts gas engine for internal use.
 - Successfully obtained approval for net export capacity of 2.0 megawatt from SEDA Malaysia in December 2016 and REPPA has been signed with Sabah Electricity Sdn. Bhd. (“SESB”).
 - Installation of 2 units of 1.2 megawatts gas engine for supply to SESB grid commenced in September 2019 and completed in February 2022. Our biogas plant has commenced supply of power to grid since December 2022.
 - For FY2026, revenue of RM4.6 million has been generated from supplying power to SESB grid. We expect this plant could contribute annual revenue of RM5 to 6 million.

Near Term Prospect (continued)

Mill (continued)

Power projects implementation in: (continued)

- » Mill at Telupid, Sabah
 - 2 units of 500 kilowatts gas engine for internal use.
 - Successfully obtained approval for net export capacity of 1.5 megawatt from SEDA Malaysia in September 2019 and REPPA has been signed with SESB.
 - Biogas plant with 2 units of 0.9 megawatts gas engine has commenced supply of power to grid since December 2023.
 - For FY2026, revenue of RM2.7 million has been generated from supplying power to SESB grid. We expect this plant can contribute revenue of RM3 to 4 million.

To set up a palm oil mill in Sarawak.

KLR Group's Future Plan

KIM LOONG
RESOURCES BERHAD

KLR's future plans are as follows:

- ❖ To source for additional plantation land in Sabah and Sarawak. However, compliance with MSPO restrictions and ESG policies are major constraints.
- ❖ To continue replanting of older palms to ensure continued growth in future FFB production.
- ❖ To improve mechanisation of plantations systems.
- ❖ To invest in solar farm project.
- ❖ To invest in coconut cultivation project.
