EXPLANATORY NOTES

A1. Basis of preparation

The interim financial report is unaudited and has been prepared in accordance with Financial Reporting Standard (FRS) 134: Interim Financial Reporting issued by the Malaysian Accounting Standards Board ("MASB") and paragraph 9.22 of the Listing Requirements of Bursa Malaysia Securities Berhad ("Bursa Securities").

The interim financial report should be read in conjunction with the audited financial statements for the financial year ended 31 January 2016. These explanatory notes attached to the interim financial statements provide an explanation of events and transactions that are significant to the understanding of the changes in the financial position and performance of the Group since the financial year ended 31 January 2016.

The accounting policies and methods of computation adopted by the Group in these interim financial statements are consistent with those adopted in the audited financial statements for the financial year ended 31 January 2016 except for the adoption of the amended FRSs which are relevant to the Group's operations with effect from 1 February 2016 as set out below:

Annual Improvements to FRSs 2012-2014 Cycle

Amendments to FRS 11: Accounting for Acquisitions of Interests in Joint Operations

Amendments to FRS 116 and FRS 138: Clarification of Acceptable Methods of Depreciation and Amortisation

Amendments to FRS 127: Equity Method in Separate Financial Statements

Amendments to FRS 101: Disclosure Initiative

Amendments to FRS 10, FRS 12 and FRS 128: Investment Entities: Applying the Consolidation Exception

The Directors do not expect any material impact on the financial statements arising from adoption of the above standards.

The Group has not elected for early adoption of the following new and amended FRSs relevant to the current operations of the Group, which were issued but not yet effective for the financial year ending 31 January 2017:

Effective for financial periods beginning on or after

Amendments to FRS 107: Disclosure Initiative 1 January 2017 Amendments to FRS 112: Recognition of Deferred Tax Assets for Unrealised 1 January 2017

Losses

Amendments to FRS 2: Classification and Measurement of Share-based 1 January 2018

Payment Transactions

FRS 9 Financial Instruments 1 January 2018

Amendments to FRS 10 and FRS128: Sale or Contribution of Assets

Malaysian Financial Reporting Standards (MFRS Framework)

The MFRS Framework is to be applied by all Entities Other Than Private Entities for annual periods beginning on or after 1 January 2012, with the exception of entities that are within the scope of MFRS 141 Agriculture (MFRS 141) and IC Interpretation 15 Agreements for Construction of Real Estate (IC 15), including its parent, significant investor and venturer (herein called 'Transitioning Entities').

Transitioning Entities are allowed to defer adoption of the new MFRS Framework. Consequently, adoption of the MFRS Framework by Transitioning Entities will be mandatory for annual periods beginning on or after 1 January 2018.

The Company falls within the scope definition of Transitioning Entities and accordingly, will be required to prepare financial statements using the MFRS Framework in its first MFRS financial statements for the year ending 31 January 2019. In presenting its first MFRS financial statements, the Company will be required to restate the comparative financial statements to amounts reflecting the application of MFRS Framework. The majority of the adjustments required on transition will be made, retrospectively, against opening retained profits. The Group and the Company are in the midst of assessing the impact of adopting the MFRS Framework.

A2. Seasonal or cyclical factors

Based on recent observation, the production of Fresh Fruit Bunches ("FFB") from our mature estates is normally low during the first quarter of each year and will rise in the second quarter, peak in the third quarter and then slowly decline in the fourth quarter. The production of FFB for the current quarter was 28% higher comparing to the preceding quarter which was broadly in line with national production trend.

A3. Unusual items

There were no unusual items that have material effects on the assets, liabilities, equity, net income or cash flows for the current financial year-to-date.

A4. Material changes in estimates

There were no changes in estimates that have had material effects in the current quarter.

A5. Debt and equity securities

There were no issuances, cancellations, repurchases, resale and repayments of debt and equity securities during the first half year ended 31 July 2016 except for repurchase of 10,000 ordinary shares of RM1 each of its issued share capital from the open market for a total consideration of RM33,241 at an average price of RM3.30 per share.

A6. Dividends paid

No dividends have been paid during the current financial year-to-date.

Plantation operations

The revenue from plantation operations for the current quarter and the year-to-date was just slightly lower as compared to the corresponding periods last year. In terms of profit for the current quarter and year-to-date, the plantation operations recorded higher profit by 13% and 2% respectively as compared to the corresponding periods last year. The higher profit was mainly contributed by better FFB price despite lower production.

The FFB production for the current quarter was 67,200 MT which was 18% lower than 82,200 MT achieved in last year corresponding quarter. For the year-to-date, the FFB production was 119,700 MT which was also 18% lower than 146,400 MT in last year corresponding period. The significant drop in production was broadly in line with the national production trend and was likely caused by the El Nino phenomenon.

The plantation operations did not face problem in selling its FFB production as most of the produce was supplied to mills within the Group. The average FFB prices were about 20% higher for the current quarter and year-to-date comparing to the respective corresponding period last year.

(Company Number: 22703-K)

Palm oil milling operations

The revenue from the milling operations was marginally lower for the current quarter but slightly higher by 3% for the year-to-date as compared to the corresponding periods last year. However, the profit recorded for the current quarter was only RM8.03 million which was 50% lower comparing to the profit achieved in the corresponding period last year. For the year-to-date, the profit of RM16.27 million achieved was 40% lower than last year corresponding period. The drop in profit was partly caused by lower oil extraction rate ("OER") as well as lower FFB intake arising from competition for crop in view of low FFB production during the current quarter and year-to-date.

Total CPO production for the current quarter and year-to-date were 63,400 MT and 114,800 MT which were 21% and 19% lower than 79,800 MT and 142,100 MT achieved in the corresponding periods last year.

The market condition and demand for the Group's milling products has been good and steady for the current quarter and year-to-date. The sale of CPO, the main product, for the current quarter and year-to-date were 67,600 MT and 126,300 MT respectively. The average prices of CPO for the current quarter and year-to-date were both in the region of RM2,490 per MT which was about 14% higher comparing to the respective corresponding periods last year.

B2. Comparison of profit before tax for the quarter reported on with the immediate preceding quarter

The PBT for the current quarter was RM26.23 million which was 42% higher than RM18.41 million achieved in the preceding quarter ended 30 April 2016. The increase in profit was mainly contributed by increase in FFB production under the plantation operations. The FFB production for the current quarter was 67,200 MT which was 28% lower than 52,500 MT achieved in the preceding quarter. The increase in FFB production in the current quarter was broadly in line with national production trend.

As for the milling operations, FFB processed during the current quarter was 296,300 MT which was 23% higher than 241,000 MT recorded in the preceding quarter resulting from recovery of FFB production in the regions. Although there was a sharp decline in CPO price in July 2016 to RM2,340 per MT, the average price of CPO for the current quarter stood at about RM2,490 per MT level which was just marginally higher than RM2,480 per MT in the preceding quarter.

B3. Current financial year prospects

For the financial year ending 31 January 2017, we foresee an increase in FFB production from young mature area but in view of the potential effects caused by El Nino phenomenon in the first quarter and lower-than-expected FFB yield recovery in Keningau region in where about 50% of the Group's planted mature area is located, we expect the Group's FFB production could potentially be around 10% lower comparing the quantity achieved in the financial year 2016.

In term of CPO production, we expect it could be about 10% lower, comparing to the quantity achieved in the financial year 2016 mainly due to lower FFB intake in the Keningau region caused by low FFB production and stiff competition for crop.

Subject to the fluctuation in the Ringgit currency and commodity market, we expect the prospect of CPO price to be good with strong support at current level considering a potential lower-than-expected CPO supply in the remaining period of the current financial year which could have been affected by the El Nino phenomenon.

Despite a drop in production, we expect the Group's performance for the financial year 2017 to be satisfactory based on current good palm oil prices.
